

## Be A Data Care Professional

**Data - The most important and most expensive part of any computer. Whether it is documents prepared by an executive, a balance sheet/profit and loss account prepared by an accountant, inventory details prepared by a store keeper, presentation prepared by a sales manager, all these require investment of time and money. It is proven that any document created once cannot be recreated back in the same manner. Loss of data is loss of creativity, time & efforts. Every user should be capable of handling data disasters themselves and not be totally dependant on their support company or IT department.**

**Unistal's certified data care professional course is being designed to provide both the concepts of data care vis-a-vis 1) Data Loss Prevention methodology 2) Data Recovery / Disaster Recovery solutions. This course is necessary for all computer users like accountants, consultants, scientists, IT professionals and home users too. It gives an opportunity to be ready to avoid/handle data disasters.**

Unistal Systems Pvt. Ltd. is the Data Care industry's most experienced and technologically advanced provider of data care products and solutions.

Unistal's Business Continuity product range covers data loss prevention, data recovery, automated backup, OS & application restoration. Unistal's Products help user to work with maximum efficiency without any time and data loss.
